When this bill was before the Senate Friday I expressed the regret which I felt When this bill was before the Senate on Friday I expressed the regret which I felt at making any opposition to the immediate admission of Nebraska as a State, because I said that my sympathles were with the border settlers, and if indeed at were the desire of the people of nebraska to come into the Union I should healtate very much to oppose their desire, but that I felt very much relieved from my embarrasment from the consideration of the fact that of the seven thousand seven hundred and seventy-six people who voted upon the Constitution, three thousand eight hundred and thirty-eight voted against it, lacking but fifty of being one half of the people who voted upon the subject. I also expressed my gratification at the liberality of the views expressed by the Senator from Ohio (Mr. Wade) on this question—views that I had not expected from him, and judging from his opinions generally expressed on such questions. With a census in 1880 of 28,000, with a vote in June upon the Constitution of about 7,776, with a vote in October upon an election that called out the entire population, at least-as fally as any popular election can call out the voting population, the entire vote was but 9,000. Then, sir, from the information that is before the Senate, (I exclude the opinion that came from the bureau of statistics), we are not justified in saying that the entire population of Nebraska at the time of the adoption of the Constaution was more than 35,000, at the time of the State election more than forty-or forty-five thousand; and then it presents PROFESSIONAL. CLARK'S PATENT BOILER FURNACE Is pronounced by competent engineers to be far superior to any other Furnace now in use. It is simple, more durable, cheap in construction, and saves from 80 per cent. to 50 per cent in fuel, either of wood or coal. It is in extensive use in Illinois and Iowa, and at the Indiana Hospital for the Insane, near this sity, where it is used under five Boilers. It saves fully one-third their fuel, greatly increases their draft, and consequently gives excellent satisfaction.

Recommendations

HON. JAMES THOMPSON. Judge of the Supreme Court of Pennsylvania PHILADELPHIA, April 28, 1866. I consider "Hoofland's German Bitters" a val-uable medicine in case of attacks of indigestion or Dyspepsia. I can certify this from my expe-rience in it. Yours with respect, JAMES THOMPSON.

From A. McMakin, Esq., New York, No. 6 Broadway, March 29, 1866. Dear Sir:—I take great pleasure in testifying the extraordinary remedial qualities of the Hoof and's German Bitters, procured at your establishment. lishment.

A member of the family has been for many years a perfect martyr to Dyspepsia. Palpitation of the Heart, and other distressing offsprings of a torpid liver, until persuaded to try the above celebrated remedy, which in a few weeks resulted in making her (to use her own words) "a new woman."

woman."
Tou are at liberty to make any use of this you see fit, or refer similar sufferers to.
Yours, truly,
A. McMAKIN. From the Rev. Levi G. Becg, Pastor of the Bap-tist Church, Pemberton, N. J., formerly of the North Baptist Church Philadelphia, at present Pastor of the Baptist, Church, Chester, Pa.

I have known Hoofland's German Bitters favorably for a number of years. I have need them in my own family, and have been so pleased with their effects, that I was induced to resommend them to many others, and know that they have operated in a strikingly beneficial manner. I take great pleasure in thus publicity proclaming this fact, and calling the attention of those afflicted with the diseases for which they are recommended, to these Bitters, knewing from experience that my recommendation will be ustained. I do this more cheerfully as Hoofland's Bitters intended to benefit the afflicted, and is "age a run drink."

Yours, truly.

THE attention of the public is invited to this new and valuable preparation for cleaning all kinds of glass, whether in windows or in the form of ware. Its action upon that material is atonishing, and seems more like the workings on magic than reality. It does away with soap sud or hot water, thus avoiding the slops upon the floor or adjoining paint, and the disagreeable sensation of the water running down on the arms under the sleeves, and wetting them to the shoulders. It leaves no lint upon the glass, and give it a more transparent and clearer appearance that can be got with ten times the amount of labor and time in washing. Please experiment with the samples in different manners, until you are thor oughly convinced that the article is, in every particular, fully equal to our recommendation to. Try it on your looking glass, on your windows on your silver, brass, britania or tinwayer; in fact on anything you wish to clean or polish. Rul some grease on your window, and see how quickly and easily the polish taks it off, and how singularly clear it leaves the glass. Price 25 cents.

Her conception and personation of this character is the most mutatul and life like we have ever seen, and as the play progressed she seemed to foose herself entirely in the simple hearted Irish girl, whose joys and griefs, and hopes and fears, became her own. The appreciation of her rendition of the character was attested, throughout, by hearty and well timed applause, which, in some of the most striking passages became uproarious. > CARRIAGE MANUFACTORY.—The establish nent of Mr. George Lowe, situated at 123 East Washington street, is one of the most extensive in the western country, and the three stores of the building occupied by him are literally filled with platform gear carriages, double, single and three seated buggles, barouches, phætons, rockaways, sleighs and cutters, in all stages of their course of construction, from the new material to the vehicle complete and for sale. All the articles of his manufacture, and he sells no others, are of the very best make, none but the best mechanics or material being employed, and he is prepared to furnish them at prices which will defy empetition by Eastern manufacturers. His sleighs and cutters, at the present season, form a very attractive feature of the trade in which he is engaged, especially to sleighriding people, and he has them both double and single seated to suit both the sociably or exclusion.

Tifff cheapest, safest, and in every respect the
best light now in use.

It will not smoke the chimner under any fair
test. It burns with much greater brilliancy and
steadiness than any otheroil or fluid heretofore
introduced for burning purposes. It can not be
exploded and for softness and purity of light it
can not be axeedled. Its beautiful crimson color
makes it a flundsome Parior Ornament.
It will not soil the finest fabric when saturated
with it. No dirt or oily substance collect upon
the outside of the lump in which it is used. It
emits no offunctive odor while burning, and is,
therefore, especially adapted to the sick room.
